

## ABSTRACT

A seat mount is provided for use with a vehicle seat and anchor mounts provided in or near the vehicle seat. The seat mount includes a base for placement on the vehicle seat and a vehicle anchor system adapted to be coupled to the anchor mounts. The base includes a pair of openings for receiving a portion of the vehicle anchor system. The vehicle anchor system includes an anchor belt adapted to be coupled to the anchor mounts. The anchor belt includes a strap having a central portion, opposite end portions, and a clasp coupled to each end portion and adapted to be coupled to one of the anchor mounts. The anchor belt is threaded through the openings to position the seat in a rearwardly facing anchored position on the vehicle seat. The vehicle anchor system also includes a leash coupled to the base and to the central portion of the anchor belt.
